

Please make sure:

1. you are using Universal Render Pipeline (URP) for your project.

Install the package from your package manager if you haven't installed it.

*If you encounter any problems after installing our package in your project (Eg: **error messages appear on the console, materials turn pink, etc**), please first click the link below and follow the steps in the documentation to pre-check and resolve issue, after trying the solution there it should work:*
